WHY FORT GARRY FIRE TRUCKS?

Our Crusader bodies are among the strongest and corrosion-free in the industry featuring a complete welded body and full 6061-T6 aluminum extruded sub-frame structure combined with 5052 freshwater marine-grade aluminum panels. Our Crusader pumpers deliver pump panels and controls designed with firefighters in mind while using the highest quality pumps and plumbing in the industry. Our tankers feature a wide range of tank capacities from 1500 to 3500 imperial gallons along with a variety of porta-tank options making for *One Tough Truck* your fire department and community can rely on.

"FORGED FROM FIRE... ENGINEERED FOR THE EXTREME!"

**ENGINEERED QUALITY,
MANUFACTURED
EXCELLENCE.**

From concept to completion, engineering expertise ensures that quality detail sets us apart from our competition. Our Crusader bodies come with various chassis options, the highest quality pumps, adjustable compartment shelves, roll-up compartment doors, LED emergency lighting, and a wide variety of other custom options to complete your truck so it will withstand the harshest weather, climates, and terrain on the planet.
